# BCM Energy

Smart City Expo World Congress 2019

# Our vision

In a fast-changing sector, between energy transition and new technologies, BCM Energy is innovating to meet new challenges related to the liberalization of the energy market.

Fully independent, BCM Energy now covers the entire electricity value chain, from production to the end customer, thanks in particular to its brand, the electricity supplier OUI Energy.

BCM Energy's goal is to accelerate the integration and development of renewable energies through:

- Long-term partnerships for market integration
- An attractive distribution of the added value created

# Our goals

## Aggregating

Aggregating a portfolio of decentralized renewable electricity producers, as purchase obligations, additional remuneration or free market.

## Optimizing

Optimizing energy production recovery, grid flexibility and market opportunities for our partners by integrating the entire electricity value chain, from upstream to downstream.

## Innovating

Offering innovative solutions in terms of business model, management tools adapted to renewable production and renewable supply to end consumers.

## Supplying

Supplying end consumers with a renewable electricity supply, thanks to our brand, Planète OUI

# Our services

By managing the entire electricity value chain, BCM Energy is becoming a major player in the European market. BCM Energy implements the most appropriate strategies to recover each renewable production and increase its market opportunities, with a focus on supplying end consumers.

## Access to energy and capacity markets

## Certificate management

# Our services

By managing the entire electricity value chain, BCM Energy is becoming a major player in the European market. BCM Energy implements the most appropriate strategies to recover each renewable production and increase its market opportunities, with a focus on supplying end consumers.

## Production forecasts and management tools

## Implementation of PPA

An electricity supplier  
100% renewable,  
100% positive?

**OUI**  
that's possible !

planète   
**OUI**

Think positive about our energy

OUI to self-consumption!

With Planète OUI, a new, more crosscutting, innovative and responsible approach to energy is emerging.

**Our self-consumption offer is an example of this.**

Self-consumption consists in producing your own electricity at home using solar panels and consuming it as much as possible instantly.

### Why self-consumption?

- 1** Reduce your energy bill by up to 50%
- 2** Produce electricity at a stable and competitive price
- 3** Use a green and local energy

### And why with Planète OUI ?

- We help you with your project from the beginning to the end: from the free pre-study to the installation and monitoring of the production.
- By coupling your installation with intelligent control, we ensure the best return on your investment.
